WORK EXPERIENCE

Frontend Developer

Mar 2023 - Aug 2023

Kernel Esports | Valencia City

In my role as a Frontend Developer at Kernel Esports, I focused on enhancing the user experience of the Remote Overlay Environment (ROE) for live broadcasts. I dedicated myself to coding, testing, and fine-tuning the ROE, striving for a seamless overlay environment. I collaborated closely with the development team to implement new features, optimize performance, and address technical challenges. Through determination and a passion for coding, I contributed to creating an immersive and engaging experience for esports viewers.

Creative Designer

Feb 2023 - Jun 2023

Kernel Esports | Valencia City

During my internship at Kernel Esports, I served as a Creative Designer responsible for designing various promotional materials and assets for esports events and related projects. I worked closely with the design team to create visually appealing pubmats, posters, logos, and layouts. Additionally, I contributed to refining the user interface of the Remote Overlay Environment (ROE) for live broadcasts. I collaborated with colleagues, embraced creative challenges, and continuously improved my design skills to deliver high-quality materials that captured the excitement of the esports community.

Graphic Designer

May 2019 - May 2022

InkCraft Studios | Malaybalay City

Contributed to the family-owned T-Shirt Printing business by creating and refining designs for a diverse range of products. Proficiently utilized design software such as CorelDRAW and Adobe Illustrator to produce and enhance logos and designs. Demonstrated expertise in layout design and the ability to recreate and modify existing designs to meet client needs.

WordPress Developer

Oct 2019 - Dec 2019

BUHIG | Valencia City

Designed and developed a client's website blog using WordPress, demonstrating proficiency in the platform's fundamentals. Successfully deployed the website to a cloud server, gaining hands-on experience in web hosting and management.
